## Expanded Corporate Services Center 1349 Jacobsburg Road, Wind Gap, PA

Without much fanfare, in April of 2022, renovations were completed for our new Corporate Services Facility in Wind Gap, PA. This facility houses the Commercial Division, IT, Human Development, Finance, as well as our Training Center along with approximately 1/3 of the facility being used for storage. With the grand opening of our new GMP Storage Facility in Stroudsburg, PA, the availability of additional storage at the adjacent building at that same location (our next big project) - work has started again at the Wind Gap Facility. The renovation and expansion plans include overhauling our entire HVAC system, expanding the area for our state-of-the-art virtual reality training, a studio in support of our Town Hall Meetings, and additional office space to house our growing Commercial, IT, Human Development and Finance Departments. The expansion of our Corporate Services Center will allow for more space at our Bangor, PA, cGMP facility to house more technical and manufacturing personnel. These new renovations in Wind Gap are all part of a \$30,000,000 upgrade taking place over the next three years to all our facilities as part of our new Strategic Plan and our newly launched Sustainability Program. BioSpectra is anticipating growth to over 300 employees in 2023!
