

Committed to Sustainable Pharmaceutical Manufacturing

Highlights

On track for 50% carbon reduction by 2029 with
20+% increase in green energy use in 2025

EcoVadis assessments completed for both
manufacturing sites in Pennsylvania

Achieved the highest possible score on our first
Carbon Disclosure Assessment

Implemented an in-depth, mandatory ethics
training for all employees

Hosting our first sustainability audit by SGS, 3rd
party auditor for TfS (Together for Sustainability)

2024 Corporate
Sustainability Report

Platforms

EcoVadis & CyberVadis

- Currently rated at both sites at “high” bronze

SBTi Science-Based Target Initiative

- Validated reduction targets aligned with the Paris Protocols

Carbon Disclosure Project

- BioSpectra achieved the highest score available for an SME

Manufacture 2030

- We continue to track our Scope I and Scope II emissions with a customizable action plan for carbon reduction

Worldfavor

- We continue to track goals and implement policies for environmental, social and governance themes.
