Intended for Use in Biopharmaceutical & Biotechnological Applications and Products

This is a high purity, GMP, reagent grade product, purified under full cGMP conditions. Uridine is a glycosylated pyrimidine- analog containing uracil attached to a ribose ring via a β -N1-glycosidic bond. It is one of the five standard nucleosides which make up nucleic acid. Uridine is used as a nutrient and an intermediate in biopharmaceutical preparations with other biotechnology applications.
